

We contribute
to the success of strategic sectors

LIDERING helps build infrastructures and facilities that are more robust and reliable. We bring safety to industrial processes and are present in companies and sectors that make our lives easier and safer.

Through our products we cooperate in protecting and caring for the environment. We currently work in sectors such as:

- Food and Beverages
- Chemical
- Petrochemical
- Pharmaceutical
- Maritime
- Renewable energies
- Paper and Pulp
- Water treatment
- Waste recycling

We are
close to you...

Established in 1975 and specialises in designing, manufacturing, repairing and selling mechanical seals. We provide effective solutions worldwide.

We are present in all five continents, with a wide network of centres, distributors and customers in strategic sectors who have put their faith in us as their main mechanical seal supplier.

We are pleased to contribute to and form part of a responsible industry that works to build a better world and a safer future.

an EPI INDUSTRIES family of companies

RMS Mechanical Seals

Our range of mechanical seal covers pumps, agitators and other complex systems in which sealing is an essential requirement to guarantee the efficiency and safety of the facilities.

We now have a huge product range that grows at the same pace as our customers' demands and an extensive line of spare parts compatible with the originals of the most popular industrial pump manufacturers, such as Flygt®, Grundfos-Sarlin®, ABS®, Alfa Laval®, Hilge®, APV®, Fristam®, etc.

We also supply kits that contain mechanical seals and other replacement elements.

Applications of Mechanical Seals RMS:

- Waste water transfer pumps
- Heating pumps
- Food product transfer pumps
- Pumps and agitators for pharmaceutical products
- Maritime sector pumps

RMS Mechanical Seals

The RMS seal range is compatible with the most popular pump brands: Flygt®, Grundfos-Sarlin®, ABS®, Alfa Laval®, Hilge®, APV®, Fristam®, etc. These mechanical seals have special designs for wastewater pumps, heating, food products, pharmaceuticals and many applications in all kinds of industrial sectors.

Manufacture and repair of mechanical seals

Our over 40 years' experience in the market positions us as experts in solutions for the pumping and fluid transfer industry.

We apply our experience and technology to repairing and commissioning mechanical seals for pumping and stirring equipment, compressors or propulsion systems implementing improvements that lengthen the life of the equipment and improve its reliability and performance.

We offer:

Manufacture of custom-engineered mechanical seals

At our production centre in Reus (Tarragona) we are able to manufacture any type of mechanical seal, including standard market solutions and special custom-engineered seals for our customers.

Repairing of mechanical seals

- Repair and improvement of mechanical seals.
- Modification of components and equipment housings
- Sealing tests
- Assembly and dismantling of customer equipment in our facilities

For other types and models consult.
